# TYRANNICAL TECHNOLOGIST

EVENT
We've all the heard the rumours- the network administrator has been less than civil with other community members. It's getting to the point where people don't feel comfortable being involved in the project.

EFFECT
All technologists sit aside while this event is in effect.

RECOMMENDED RESOLUTION
(1/2/3) Technologists must trade role cards with Residents.

COMMUNITY
BORDER NODE

EVENT
Exciting times! Looks like there is interest from the neighbouring community to expand the network to cover both communities. Important to make sure things get off to the right start!

EFFECT
Cannot build new nodes while this Event is in effect.

RECOMMENDED RESOLUTION
All Organizers and (1/1/2) representatives from each node color are brought to the site to propose a solution.

CONSTRUCTION

EVENT
Looks like that development is going up after all. After years of stalled talks, the City and the owner of the vacant lot across the street came to an agreement. Work on the site started much sooner than you anticipated.
EFFECT
Path between two nodes cannot be used to deliver data packets while this Event is in effect.

RECOMMENDED RESOLUTION
Organizer might find and bring the following players to the site to resolve:
- (1/1/2) Technologist

INTERFERENCE

EVENT
When the network was originally designed there was more distance between all these nodes. Over time more were added to meet demand, leading to an area saturated in signal.

EFFECT
Any data packets passing through this node are delayed while this event is in effect. Players delivering data packets have to walk backwards on all paths leading to and from the node.

RECOMMENDED RESOLUTION
Organizer might find and bring the following players to the site to resolve:
- (1/1/2) Residents of all Node Colours connected to the nexus of interference
- (1/3/5) Technologist

LANGUAGE BARRIER

EVENT
Uh oh... got some feedback from your neighbours. Trying to be careful with terminology and jargon hasn't been enough. If people don't feel like they can participate in conversations, how do they get engaged in the network building process?

EFFECT
It takes double the number of Residents to build a new node while this Event is in effect.

RECOMMENDED RESOLUTION
Organizer might find and bring the following players to the site to resolve:
- (2/5/7) Technologist
- (1/1/1) Resident of each Node Colour

AND Organizer determines next location to place node with these Technologists

MAINTENANCE MISHAP

EVENT
The roof gets checked periodically by the property managers. Unfortunately, access is right beside where the node was initially installed. There have been issues with the signal- these folks need to be more careful.

EFFECT
Choose a path connecting to this node. Only this path be used to deliver data packets while this Event is in effect.

RECOMMENDED RESOLUTION
Organizer might find and bring the following players to the site to resolve:
- (1/2/2) Technologist

POWER OUTAGE

EVENT
Flooding caused issues at a transformer station serving almost half of the neighbourhood. Our bad luck that the half includes the building our node(s) is/are in. Power company crews are working around the clock to restore power in affected neighbourhoods.

EFFECT
Node cannot be used to deliver data packets while this Event is in effect.

RECOMMENDED RESOLUTION
Organizer might find and bring the following players to the site to resolve:
- (1/1/2) Residents of the Node Colour
- (1/3/5) Technologist

RE-TARRING THE ROOF

EVENT

The landlord finally was able to get those roofers up to patch the leaks. Unfortunately, the whole block smells like creosote, the internet is all wonky. It sounds like they'll be up there all week.

EFFECT

When going to or from this node, take two steps forward and one step backward.

RECOMMENDED RESOLUTION

Organizer might find and bring the following players to the site to resolve:

- (2/3/4) Residents of the Node Colour

SCHOOLYARD BALL MISHAP

EVENT

The old 'throw the ball on the school roof' game keeps going strong, only this time it looks like one of the students had killer aim.

EFFECT

Node cannot be used to deliver data packets while this Event is in effect.

RECOMMENDED RESOLUTION

Organizer must find and bring the following players to the site to resolve:
- (1/1/2) Residents of the Node Colour
- (1/2/3) Technologist

SITE SPONSOR LEAVES

EVENT
Only a matter of time before they retired - it was mentioned during the initial discussions to build the node onsite. Sounds unclear whether you'll be able to keep the site once they are gone... bummer.

EFFECT
Node cannot be used to deliver data packets while this Event Card is in effect.

RECOMMENDED RESOLUTION
Organizer can find and bring the following players to the site to resolve:
   • (1/1/1) Resident of the Node Colour
  AND Organizer switches roles with that Resident

TREE DOWN

EVENT

There was a severe weather warning during the thunderstorms last night. One of the oldest Oaks on the block didn't survive the wind. Worse yet, when it came down it somehow damaged the antenna on the node.

EFFECT

Node cannot be used to deliver data packets while this Event is in effect.

RECOMMENDED RESOLUTION

Moving the Tree: Organizer could find and bring the following players to the site to resolve:

- (2/2/3) Residents of the Node Colour
- (1/2/3) Technologist
